HOW TO MAINTAIN YOUR APRONS

CARE

Remove any debris with a spatula or damp towel. Clean with a foaming carpet cleaner of your choosing. Avoid the use of alkali detergents alcohol or alcohol-based cleaning detergents. The garment may also be placed in a bathtub of cool water to soak and then gently scrubbed, then rinsed with cool water and either hung to dry or placed (flat) on towels in a room temperature environment avoiding heat and sunlight.

CLEAN

Remove any debris with a spatula or damp towel. Clean with a foaming carpet cleaner of your choosing. Avoid the use of alkali detergents alcohol or alcohol-based cleaning detergents. The garment may also be placed in a bathtub of cool water to soak and then gently scrubbed, then rinsed with cool water and either hung to dry or placed (flat) on towels in a room temperature environment avoiding heat and sunlight.

DISINFECT

Disinfect using a product of your choosing. Use in accordance with the manufacturer instructions.
Avoid chlorine, iodine or peroxide-based products as they will effect the colorfastness of garment.

MAINTAIN

A protective garment must be monitored to ensure that it has not been compromised. Periodic and, at least, annual inspections should be performed to look for tears, cuts, rips or pinholes. If detected, further testing of the garment should take place. If shrinkage has taken place, the garment should be discarded.
