Venus Bulk Flow ONE

Product Description

VENUS BULK FLOW ONE - ONE SHADING MEETS BULK FILLING.

Venus Bulk Flow ONE simplifies and streamlines the restorative process

As a further universal shade solution for efficient restorations in the posterior region, it represents the first flowable **one-shade bulk-filling composite** in the dental market that adapts to any tooth shade from A1 to D4.

- **Always grab the right shade:** With the incredible shade-matching properties of Venus Bulk Flow ONE the restoration becomes invisible by blending into the surrounding dentition.

- **Efficient handling:** Cavities are filled quickly and easily with increments of up to 4 mm without the need for an additional capping layer.

- **Long-lasting restorations:** Low shrinkage stress, high flexural strength and high wear resistance ensure durable restorations that withstand the high mastication load in the posterior region.
